Saved me money

Fantastic service, resulting in an outstanding job! Shaun is excellent value for money. Will always take the car to him.

About Us

Based in Chawston, Cambridgeshire, close to St Neots and the Black Cat roundabout on the A1, we provide professional vehicle mechanical and auto electrical services for private motorists and local businesses throughout the surrounding area.

Auto electrics are a particular speciality, covering everything from standard vehicle electrical systems and fault finding to the installation of additional equipment and modifications. We also provide air-conditioning servicing and re-gassing, engine diagnostics, restoration work and general vehicle maintenance.

If your vehicle won't start or cannot be driven to us, we can also arrange collection, making it easier to get your vehicle inspected and repaired.

Whether you rely on your car every day or need to keep a work van on the road, our aim is simple: provide dependable, straightforward service and quality workmanship you can trust.

So many reasons why motorist's continue to choose us:

- ✓ Over 25 years' experience in vehicle repair and maintenance
- ✓ A strong local reputation built over many years
- ✓ Honest, straightforward advice you can trust
- ✓ Competitive pricing with no unnecessary work
- ✓ Experienced in both mechanical and auto electrical repairs
- ✓ Reliable fault finding and diagnostics
- ✓ Friendly, personal service from an established local business
- ✓ Cars and light commercial vehicles welcome

My car is not starting, can you collect it from my home?

Yes. If your vehicle is a non-starter or you're unable to safely drive it to us, we can arrange collection from your home or workplace. We can then diagnose the problem and advise you on the repairs needed to get you back on the road.

Not sure what's wrong. Can you diagnose the problem?

Absolutely. You don't need to know what the fault is before contacting us. Whether the vehicle won't start, has a warning light on the dashboard, is making an unusual noise or simply isn't running properly, we can investigate the problem and identify the likely cause. As vehicle mechanics and auto electrical specialists, we can diagnose both mechanical and electrical faults.

Do you repair vans and commercial vehicles?

Yes. We regularly work on vans and light commercial vehicles as well as private cars. We understand that for small businesses and tradespeople, a van being off the road can mean lost working time, so we'll always aim to diagnose the problem and get the vehicle back in service as efficiently as possible.

Can you diagnose electrical faults/dashboard warning lights?

Yes. We specialise in auto electrical diagnostics as well as general mechanical repairs. If you have warning lights, intermittent electrical problems, battery issues, starting faults or something simply isn't working as it should, we can investigate the cause and recommend the appropriate repair.

Can you arrange an MOT for my vehicle?

Yes. Although we don't carry out MOT tests ourselves, we work with a trusted local MOT testing station and can arrange the MOT on your behalf. If any repair work is required beforehand, or the vehicle fails the MOT, we can also help get the necessary work completed.

Can you repair accident or crash damage?

We can inspect accident-damaged vehicles and carry out many of the mechanical and electrical repairs that may be required following a collision. This can include damaged components, electrical faults and problems affecting how the vehicle runs or drives. We do not undertake specialist bodywork or paint repairs, but we can advise you if additional work from a body repair specialist is required.

Do you work on electric vehicles?

At present, we do not undertake repair or maintenance work on fully electric vehicles. We work primarily on petrol and diesel cars and light commercial vehicles. If you're unsure whether we can work on your particular vehicle, give us a call and we'll be happy to advise.

Can you repair my vehicle before its MOT?

Yes. If you know your vehicle needs work before its MOT, we can inspect it and carry out any necessary repairs beforehand. We can also arrange the MOT through our partner testing station, making the whole process easier to manage.
