Saved me money

Fantastic service, resulting in an outstanding job! Shaun is excellent value for money. Will always take the car to him.

Auto Electrical Specialists

At 1st Call, auto electrics is one of our specialist areas. With more than 25 years' experience in the motor trade, we provide professional auto electrical diagnostics, repairs, installations and modifications for customers across St Neots, Cambridgeshire and Bedfordshire.

Whether you have a vehicle that won't start, a warning light that keeps appearing, an intermittent electrical problem or equipment that has stopped working altogether, we have the experience and diagnostic equipment to investigate the fault and get to the root of the problem.

Vehicle Electrical Fault Finding

Electrical faults can be frustrating, particularly when the problem comes and goes or there is no obvious reason for something to have stopped working.

Our diagnostic and fault-finding service can investigate problems with vehicle wiring, batteries, alternators, sensors, lighting, charging systems, electronic control units and other electrical components.

Rather than simply replacing parts and hoping the problem disappears, we aim to identify the underlying cause of the fault and recommend the appropriate repair.

If your vehicle won't start and cannot be driven to our workshop, we can also arrange collection from your home or workplace.

Classic & Vintage Vehicle Auto Electrics

Our experience isn't limited to modern vehicles. We can also undertake electrical work on classic and vintage cars, where repairing or recreating wiring requires a different approach.

Where appropriate, we use modern PVC-insulated automotive cable while retaining the appearance and character of the original installation. Wiring can be braided or bound to complement the vehicle, and we use original manufacturer's colour coding wherever possible.

We also make every effort to source original-style terminals, fittings and wiring accessories. Where components are no longer manufactured, we can identify suitable modern alternatives while remaining sympathetic to the original vehicle.

This makes us a good choice for restoration projects, electrical upgrades and resolving long-standing faults on older vehicles.

Auto Electrical Repairs

From relatively straightforward wiring problems to more complicated electrical faults, we undertake a wide range of auto electrical repairs.

Our work includes:

- ✓ Electrical fault finding and diagnostics
- ✓ Battery and charging system faults
- ✓ Alternator and starter motor problems
- ✓ Wiring repairs and replacement
- ✓ Lighting and electrical component faults
- ✓ Sensors and electronic control systems
- ✓ Dashboard and warning light investigation
- ✓ Intermittent electrical problems
- ✓ Electrical modifications and upgrades
- ✓ Installation of additional vehicle equipment

If you don't know what's causing the problem, don't worry. Tell us what the vehicle is doing and we'll take it from there.

Experienced Auto Electricians Near St Neots

Based in Chawston, Cambridgeshire, close to St Neots and the A1, we work with private motorists, tradespeople and small businesses throughout Cambridgeshire and Bedfordshire.

With more than 25 years of experience, we have built our reputation on knowledgeable fault finding, quality workmanship and straightforward advice.

From tracing an awkward electrical fault to installing new equipment or working on the electrical system of a classic vehicle, we have the tools and experience to help.

Electrical Installations & Vehicle Upgrades

Auto electrics aren't only about repairing faults. We can also supply and install a wide variety of additional electrical equipment and vehicle upgrades. Depending on your vehicle and requirements, installations can include:

- ✓ Immobilisers and proximity alarms
- ✓ Vehicle tracking systems
- ✓ Bluetooth solutions
- ✓ Remote central locking kits
- ✓ Car audio equipment
- ✓ Satellite navigation systems
- ✓ Front and rear parking sensors
- ✓ Front and rear dash cameras
- ✓ External vehicle cameras
- ✓ LED lighting upgrades
- ✓ Multimedia systems
- ✓ CCTV and Wi-Fi equipment

If you have something particular in mind, speak to us about your vehicle and what you would like to achieve. We can advise on the most suitable approach and provide an estimate for the work.

Need Help With a Vehicle Electrical Problem?

If you have an electrical fault, a non-starting vehicle or an upgrade you would like installed, get in touch. Tell us what vehicle you have and what you've noticed, and we'll advise you on the next step and provide an estimate for the work.
